-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The abstract of the disclosure is objected to because it uses the words "disclosed" and "comprises". Correction is required. See MPEP § 608.01(b).

Claim Objections

3. Claim 22 is objected to because of the following informalities: It appears that the word "slope" and a period were inadvertently omitted from the end of the claim. Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 19-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Falcoff et al.

Re claim 19, Falcoff discloses a method for cycling a vehicular overhead storage assembly, comprising the step of slidably moving a tray from a stowed position to a deployed position, wherein the tray moves, in sequence, from a first position to a second position, and from the second position to a third position.

Re claim 20, the arranged slidable movement of the tray in the sequence is defined by a generally sinusoidal path, wherein the first position includes a positive slope (the point at which 165 in the lower track first meets the forward stop in figure 6), the second position includes a zero slope (the point at which the upper rear corner of 65 in figure 6 just it has moved to the apex of its movement), and the third position includes a negative slope (the point at which the upper rear corner of 65 in figure 6 just it has moved past the apex of its movement).

Re claim 21, the method includes extending the tray to an extended deployed position, wherein the tray moves, in sequence, from a fourth position (just after the third position) to a fifth position (immediately after the fourth position).

Re claim 22, the forth position includes a first negative linear slope, and the fifth position includes a second negative linear slope, wherein the second linear slope is greater than the first linear slope (see figure 6 and the explanation above).

Allowable Subject Matter

6. Claims 1-18 are allowed.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Klein and Kato disclose storage mechanisms for vehicles.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason S. Morrow whose telephone number is (703) 305-7803. The examiner can normally be reached on Monday-Friday, 8:00a.m.-4:30p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Dayoan can be reached on (703) 308-3102. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
